

FOR IMMEDIATE RELEASE

## *Family Connections are Made with Mothers Day in Mind*

BLEND CREATIONS INTRODUCES CONNECTION NECKLACES

Every family has a special story and special occasions are often a unique blend of meaning and traditions. Mother's Day is about celebrating the wonderful women that make a difference in our lives — mothers, grandmothers, stepmothers, mothers-in-law, or any other "difference-makers" deserve to be celebrated on this day.

In the spirit of Mother's Day, Blend Creations would like to introduce its collection of Connection Necklaces. You can customize your connection necklace to suit your style or symbolize the important connections of your life. Choose the number of rings to represent the number of years in a significant relationship, the number of family members, or just because you like the look. Then choose your accents: Swarovski crystals are available in different birthstone colors that represent the months of the year. A mother can wear the birthstones of her children and show off just how close she keeps them to her heart. Given as a gift, the connection necklace provides the perfect way to thank mom for all the things only she can do.

This Collection has hit a cord with people which surprised even the designers, "*The Connections necklaces have been very well received by customers. Our Facebook Fans were able to let us know the birth months of their family members and we showed photos of what each person's customized family necklace would look like. In turn, we've heard so many touching stories of what the necklaces would mean to the women who would wear them. Every person's family is unique and we've now realized how special each family's story can be.*" says Vivian Cheng.

Here are two of the special stories received:

*"I'd love to have the Quintet Connection Necklace for my mother since Mother's Day is coming up. We're a "blended" family; my mother married a man who has three children so there are now five siblings and while we're not "blood" we all love each other very much..."*

*... The necklace is gorgeous and the sentiment behind it would be beautiful."*

— COMMENT BY SHEL ON BLENDCREATIONS.COM

*"When I submitted my colors for my children [for a Connection necklace], I did it in chronological order...my firstborn son, September and my daughter, August and last son, August.*

*When the example was posted it was September in the middle with August on each side. I couldn't help but be struck at how the two were 'hugging' September. Our firstborn son sadly passed away before I went into labor 6 years ago. I loved that my two that are here with us are holding him. At least, that is how I felt right when I saw the arrangement."*
